Introduction

Thank you for purchasing DEFORM, a very special soundsset for **Diva**. We hope you will enjoy playing these sounds and put them to good use in your music!

the u-he team

Installation

DEFORM comes in two formats: The DEFORM folder contains normal .h2p files which are recognized in Diva's own browser, while the DEFORM (NKS) folder contains Native Kontrol Standard files. If in doubt, install the regular version only.

Regular version

You can install DEFORM anywhere within Diva's 'Local' folder. Mac owners can use the extra 'User' folder as alternative location.

- 1) Load an instance of Diva and click on the PATCHES button (bottom right)
- 2) In the 'Directory' panel, right-click on 'Local' and select 'reveal in Finder' (Mac) or 'open in Explorer' (PC)
- 3) Copy the DEFORM folder into the 'Diva' folder you have just revealed
- 4) Back in Diva's own browser, right-click on 'Local' again and select 'refresh'

Note: Diva requires all presets to be in the following locations:

Windows	'Local'	(YOUR PLUG-IN PATH) \u-he\Diva.data\Presets\Diva\
Mac OSX	'Local'	MacHD/Library/Audio/Presets/u-he/Diva/ or
	'User'	~/Library/Audio/Presets/u-he/Diva/

NKS version

Copy the folder "DEFORM (NKS)" into the following location:

Windows	(YOUR PLUG-IN PATH) \u-he\Diva.data\NKS\Diva\
Mac OSX	~/Library/Application Support/u-he/Diva/NKS/Diva

Alternatively, select Diva in your Komplete Kontrol host, right-click on the search result list and select "Find in Explorer/Finder" to open the NKS presets folder.

About the author

HYHON is an avant-garde sound designer and music producer living in Tel Aviv who likes to push boundaries. In his own words:

"I want to tell a story – or at least evoke a vision – through my sounds and my music. The power to surprise an audience is very important to me, and I'd like to communicate that there is no limit to human imagination."

Playing the Presets

Performance Control

Most DEFORM presets include realtime MIDI performance control, which has been carefully programmed so you can create dramatic sweeps or various other ‘morphing’ effects using pressure and/or the lefthand controls on your MIDI keyboard.

The controls used in each preset are listed in Diva’s **patch Information** panel at the bottom right of the PATCHES view (see Diva user guide, page 7). While auditioning presets, please make a habit of reading this information and trying out all the controls mentioned there!

mod wheel This is the rotary control found on the left of nearly all MIDI keyboards (some have a joystick or lever there instead). Standard MIDI CC #1.

pitch wheel aka **pitch bender**, the centre-sprung wheel (joystick or lever). Although most DEFORM presets use this for wide-range pitch control, some of them apply the control to other parameters.

pressure aka **aftertouch**, this important control is often missing in consumer-grade MIDI keyboards. If your keyboard is unable to send aftertouch directly, check whether you can simulate it via knob/slider. Failing that, try converting normal CC (continuous control) data into **channel pressure** or **poly pressure** (which Diva also recognizes) within your host application.

Note: The patch information for a few presets mentions **breath** control. This is simply MIDI CC (continuous control) number 2 – you don’t have to own any extra hardware.

Preset Alternatives

DEFORM includes several presets with multiple alternatives, usually numbered 1, 2, 3 etc.. Although these can sound very similar at first, they react very differently to the performance controls (see above).

Preset Lists

01 Experimental FX (A-H)

8-to-Bit M	Come On Fasterrr	From Hell with Love 1
80s Race	Crash 222	From Hell with Love 2
Above It All 1	Cyborg Collapse	From Hell with Love 3
Above It All 2	Deep Attack	Future Laser Reload
Above It All 3	Delirium	Game Compendium
Agonal Pant	Delysid Flux 1	Garbage Dance 1
Akira	Delysid Flux 2	Garbage Dance 2
Allochiria 1	Diva Bomb 1	Gehenna
Allochiria 2	Diva Bomb 2	Glitch Or Die (no glitch)
Allochiria 3	Diva Bomb 3	Glitch Or Die (original)
