260+ PERFORMANCE PRESETS FOR HIVE 2

HECKMANN AUDIO GMBH — BERLIN

# Introduction

This soundsset presents musicians with a wide range of expressive instruments which capture the elusive quality of electro-mechanical keyboards as well as classic hardware synths of the '90s. Keyboard pros will appreciate the nuanced velocity and aftertouch response, while everyone should enjoy exploring the infinite macro variations...

## Macros

The "8 knobs" view of the XY panel lets you adjust macros while displaying all options. Alternatively, you can use the row of knobs in the PRESET browser window.

## XY Showcase

Below the main category folders listed below, both Sugar and Spice include an extra folder containing many examples of how the macros can be used to add yet more Sugar and more Spice to the basic presets!

## Keyboard Control

Various effects can be performed via aftertouch as well as the lefthand controls on your MIDI keyboard. These controls are listed in the PRESET INFO panel – one advantage of keeping the browser open instead of the XY panel. For details, see the Hive user guide.

## The Authors

**SUGAR** by Michael Cavallo a.k.a Monomo Sound Design

A seasoned guitarist, Michael's interest in sound design started around 1990 when he acquired a Roland D20 to replace his humble Casio MT60! Michael says that his main inspiration for synth sound was the music of Patrick O'Hearn and Suzanne Ciani.

**SPICE** by Howard Scarr

Howard has been playing synthesizers since 1973 when he co-founded the UK's first all-synthesizer band, Zorch. His sounds can be heard in the scores to *The Dark Knight*, *Inception*, *Dunkirk*, *Blade Runner 2049* and the recent *Dune* series, among others.
